SUMMARY

Enthusiastic and detail-oriented Entry-Level Python Developer with a strong foundation in programming fundamentals and problem-solving. Proficient in writing clean, efficient, and well-documented Python code. Skilled in working with libraries like Pandas, NumPy and familiar with version control tools like Git. Eager to contribute to real-world projects, learn from experienced developers, and grow in a collaborative environment. Passionate about building scalable solutions and continuously improving coding skills. Looking for an opportunity to kickstart a career in software development.

EDUCATION

- Bachelor of Technology – AI/ML (2024-2028)
- 12th – 69%
- 10th – 65%

ACHIEVEMENTS & ACTIVITIES

- Active IEEE Student Member, participating in technical and community initiatives
- Created and managed personal projects focused on data analysis and web scraping
- Regularly practice problem-solving and coding to improve technical skills
- Engaged in peer discussions and collaborative learning environments

SKILLS

- C / C++
- Jupyter Notebook
- Advanced Excel
- Visual Studio
- python

PASSIONS

- Continuous Learning and Skill Development
- Group Discussion
- Solving Real-World Problems with Code

Project 1

Web Scraping and Text Analytics Project

- Developed a Python-based solution to scrape articles and structured data from websites using Requests and BeautifulSoup.
- Implemented data extraction workflows to collect, parse, and store text data in structured formats (text/CSV).
- Built a word frequency analysis pipeline to process scraped data and identify keyword distribution, enabling insights into content trends and importance.
- Automated saving and reading of raw text files for further natural language processing (NLP) tasks.

- Strengthened technical expertise in Core Python, Web Scraping, and Text Analytics while following a staged project workflow (data collection → preprocessing → analysis).
- Used GitHub for version control and to document scripts, ensuring reproducibility and collaboration readiness.
- Key Skills: Python, Requests, BeautifulSoup, Text Analytics, Word Frequency Analysis, Data Cleaning, GitHub

Project 2

Data Wrangling and Data Analysis (Python Project)

- Performed data acquisition and wrangling on multiple datasets using Pandas and NumPy, ensuring clean and reliable data for further analysis.
- Applied various wrangling techniques including merging datasets, handling missing values, treating outliers, dropping redundant columns, and validating data correctness.
- Conducted descriptive analysis: checked dimensions, datatypes, unique values, central tendency, skewness, and correlation to derive meaningful insights.
- Combined datasets through merge and concatenation operations to prepare a unified dataset for business use cases.
- Documented and managed Jupyter Notebooks with GitHub integration for version control and reproducibility.
- Key Skills: Python, Pandas, NumPy, Data Wrangling, Data Cleaning, Outlier Detection, Correlation Analysis, GitHub
